Super-Shield

The fast and simple system for shotgun mic

This complete windshield / shock mount system has a unique 'pod' design for super-fast microphone access and, like the Modular Windshield, offers a choice in the level of wind protection provided (use with or without Windjammer®) and superb shock isolation.

This design integrates the same lightweight, flexible, robust plastic netting and screening material used in the Modular Windshield, for professional performance and reliability.

Using patented Rycote Lyre® technology, the Super-Shield provides your microphone with excellent isolation from shocks and vibrations. The clever suspension design also features 'snap-in/pinch-release' Lyre®, which can be easily set to achieve perfect microphone balance.

KEY FEATURES

Lightweight, Durable and Perfectly Balanced

The Super-Shield basket is made from our lightweight, durable, flexible grey plastic netting with a screening material attached. The shock mounts are easily configurable to achieve superb balance when the microphone is fitted.

Superb isolation

The shock mount with our patented Lyre® technology ensures superb isolation against handling and cable-borne noises.

Fast and Simple

With its clever twist-lock design, the basket 'pods' are very easy to attach and remove from the suspension chassis ring. And with the minimum number of parts overall, Super-Shield is a simple, easy to use system providing super-fast access to your microphone.

Robustness - Built-in

The basket pods connect via a durable chassis ring, which also provides added reinforcement to strengthen the windshield.

Advanced wind protection... with minimal high frequency loss

The Super-Shield Windshield Kit comes supplied with a tailor-made Rycote Windjammer®. Using the Windjammer over the windshield provides superb levels of wind-noise attenuation, but with minimal high frequency loss.

What's in the box

Select from three available kit sizes available to fit your microphone, or retrofit your kit with optional front pods and a Windjammer to adjust to fit a broad range of microphone lengths up to 300mm.

Super-Shield Kits include the following components:

- Super-Shield Suspension Chassis
- Rear Pod
- Front Pod
- Super-Shield Windjammer®
- Pistol Grip
- 45cm XLR-3F/3M Cable x 1
- Brush for fur maintenance

Kits and microphone compatibility

Order Code	Product	Specs	Mic Compatibility
RYC010320	Super-Shield Kit, Small	Suitable for mics 19/25mm, up to 200mm length. Body length: 250mm; overall length: 350mm; diameter: 100mm; net weight: 642 gram.	Oktava: MC-012, MK-012 Sanken: CS-1 Schoeps: CMC series, CMC series + CUTI Sennheiser: ME62 K6, ME64 K6, MKH 8060
RYC010321	Super-Shield Kit, Medium	Suitable for mics 19/25mm, up to 200-250mm length; body length: 300mm; overall length: 400mm; diameter: 100mm; net weight: 662 gram.	Audio-Technica: BP4073; DPA; 4017b, 4017c Neumann: KMR-81i, KMR-81D Røde: NTG-1, NTG-3 Sanken: CS-2 Schoeps: CMIT 5 Sennheiser: MKH 416 Shure: VP82, VP895 Sony: ECM 670, ECM 678
RYC010322	Super-Shield Kit, Large	Suitable for mics 19/25mm, up to 250-300mm length; body length: 350mm; overall length: 450mm; diameter: 100mm; net Weight: 692 gram.	Røde: NTG-2 Sanken: CS-3e Sennheiser: MKE 600
